

Potpourri

Collection of loose topics around data processing and analysis. Much of the documentation is from older websites, is not checked, and thus may be deprecated:

- [Bash Script for postprocessing with CDO](#)
- [Bitrounding and Compress](#)
- [Comparing ICON model output with reanalysis data](#)
- [General Purpose Parallel Computing in Python](#)
- [LunchBytes](#)
- [Python](#)
- [Regridding MPIOM data onto regular grids](#)
- [Ruby](#)
- [Sapphire](#)
- [Statistics](#)
- [Numerical Matsuno-Gill Model](#)
- [Processing Binary Data](#)
