

Visualization

One of the most important parts of data processing is visualization of the Output. This is the third and final part of a three part tutorial. We are going to plot the data that has been processed in Parts 1 and 2. Like in the other tutorials we are going to present recipes for visualization using shell scripting and python.

- [Quick plots with Ferret](#)
- [Plotting with Python](#)

A full list of plot solutions (independent of the tutorial):

- **[pylCON](#)**
- [2D and 3D visualization with Paraview](#)
- [Atmospheric quick plots with Renate's scripts](#)
- [Plotting with psyplot and psy-view](#)
- [Plotting with Python](#)
- [Quick plots with Ferret](#)
