Computer Training

As the MPI-M does not have it's own computer training facility we will use the training facilities of CEN (e.g. Geomatikum 1536). CEN-IT uses a virtual desktop environment for the training facilities which is documented here. To use these facilities you and your participants will need guest accounts in the CEN network, your MPIM/DKRZ account won't work.

Please send your requests **well in advance** to the CEN-IT group:
https://www.cen.uni-hamburg.de/facilities/cen-it/support/send-request.html

If you want to use the supercomputer of DKRZ (levante.dkrz.de) you must make sure that you and your participants already have access to it. If you need guest accounts on levante please send a mail to the DKRZ Beratung.
