

Configure and compile at DKRZ

A document providing technical details on how to build the model, as well as the description of basic steps required to run it, can be found in the gitlab-repositories, e.g.

<https://gitlab.dkrz.de/icon/icon/-/blob/icon-2.6.7-rc/README.md>

The short recipe for intel compiler on dkrz-levante is given here:

```
./config/dkrz/levante.intel --enable-openmp
```

Compiling

```
make -j 32
```
